Yaws, 0976511371, 9780976511373, Gulf Publishing Company, 2005

Written by the most acclaimed and respected author on chemical compounds in the field of chemical engineering, this volume is simply the most comprehensive collection of data on chemical compounds ever compiled. A compendium of over 41,000 organic and inorganic chemicals, this broad, ambitious, and invaluable work covers c1 to c100 organics and Ac to Zr inorganics, with useful applications for chemical engineers and students. For use in the field, in the lab, or in the classroom, there is no other work that comes close to the research gathered in this handy reference.
